

**Training Course in Painting Therapy  
Liane Collot D'Herbois method:  
LIGHT, COLOUR AND DARKNESS**

**“ Terra di Siena “ School**

***Introductory courses***

**Introduction to Light, Colour and Darkness**

We will explore the interplay between the great cosmic polarity of light and darkness. As soon as the cosmic light shines out into the cosmic darkness a great movement occurs. The light creates space as it pushes the darkness away. The darkness moves: away from the light, towards the light, in waves, in spirals. The darkness comes moving in from all sides, from all directions, longing for the light, loving the light. This interaction between light and darkness, this movement in space is the background of all colour, is the origin of colour.

In working with charcoal we will do an exercise in light and darkness. We will try to find the path of the light and the way the darkness wants to move towards the light.

In a veil painting we will explore the way the colour comes into being in the movements of the darkness in front and behind the light.

**Technique:** Light and darkness with charcoal on a big sheet  
Veil painting with watercolour

**Date:** 14 -15-16- 17- February 2013

**Schedule:** 9,30 – 12,30; 14,00 – 17,00
